About Me

I'm a Backend Developer Enthusiast. I am highly interested in web and application development. Specifically, I find great enjoyment in delving into server-side development and tackling the logical challenges of building robust and efficient applications. That's why I am particularly drawn to the role of a backend developer.

Skills

- HTML | CSS
- Laravel
- React JS
- Express JS
- MySQL
- MongoDB

Experience

Leet Code Community

2023-2024

Leet Code Community is a social media community that aims to exchange information regarding technological developments in the website sector, and of course more focus on the backend developer part.

Kula Koding

2024

Kula Koding is a developer community consisting of several students from PPLG who are tasked with serving requests for making software.
